Profile

Graduated in Computer Engineering from the Polytechnic University of Valencia, where I discovered my passion for programming. On a professional level I am looking to be part of the development of software products that inspire me and to see how my work impacts positively on people's lives.

Employment

Senior Software Engineer - HolaLuz

Jul 2023 – Now

Senior Software Engineer in a team focused on the development of a payment management unification system. In my position, I have had various types of responsibilities, ranging from defining technical solutions to facilitating communications between product and technology teams, as well as mentoring my junior and mid-level colleagues. Although I am a specialist in backend development with Kotlin, I am always expanding my technical horizons, and at this stage, I have been developing in Vue and implementing Kafka.

Software Engineer - Creditas - Full Remote

2021 – Jul 2023

Technical reference of a multi-country team in the development of the benefit card product for the Brazilian market. We maintained from a portal where deposits are managed to the mobile application, through the entire microservices architecture. The stack we managed was varied, from JS technologies such as React and ReactNative for the frontend, and Kotlin and Springboot in AWS for the backend in microservices.

Backend Kotlin - BNC10 - Barcelona

Feb 2021 – May 2021

Rebuild of the core application, previously in Typescript, to Kotlin following DDD and TDD methodologies. I was also involved in maintenance tasks on the android application.

Backend Java - Onebox - Barcelona

Nov 2019 – Jan 2021

Development and maintenance of the online ticketing platform for the main LFP clubs using Agile Scrum Methodology.

Technologies used: Spring, SpringBoot, Kubernetes, AWS, MySql and CouchBase.

Backend Java - GFI - Barcelona

May 2019 – Nov 2019

Process integration project between two international retail companies.

Technologies used: J2EE (EJB3.1), Java 1.8, Jax-RS, JSF Primefaces, MariaDB and Subversion.

Backend Java - ODEC - Valencia

Jul 2018 – May 2019

Business Intelligence Project for the General Directorate of Public Health of the Generalitat Valenciana.

Backend Java - InnovaSoft - Valencia

April 2017 – Jul 2018

Education

Degree in Computer Engineering with a specialization in Software Engineering

September 2013 - July 2018
